RE: PR Docket No. 93-61

Dear Chairman Hundt:

AirTouch Teletrac is the nation's leading provider of vehicle location services and has been an active participant in the above-referenced proceeding. We are aware that numerous, difficult issues have been raised by commenting parties, with particular focus on the need to allocate the spectrum to the various users fairly and equitably.

I am writing to request that you carefully consider the interests of the over 970 businesses which currently use the Teletrac system to manage their fleets. The attached customer list demonstrates that Teletrac is providing a critical service to many American businesses. Many utilities, department stores and retailers use our system without adverse effect to or from any Part 15 equipment they may also be using. For each of our customers, Teletrac represents an important investment which has increased productivity, improved customer service and enhanced security of employees and assets. To reinforce this point, I have included a few letters from our customers expressing their satisfaction with our services.

Additionally, please consider the interests of numerous governmental and law enforcement agencies that use our system, and the over 7,000 consumers who rely on Teletrac for stolen vehicle recovery and emergency roadside assistance.

We need permanent AVM rules which will allow us to continue supporting these customers and the new ones we are adding every day.

Yours truly,

A handwritten signature in black ink that reads "John R. Lister".

John R. Lister
President and Co-Chief Executive Officer

Enclosure
